

# HOW TO CARE FOR YOUR VENTER TRAILER HORSEBOX

- Clean underneath the floor mat.
- Grease the back and side ramp hinges.
- Grease the coupler.
- Charge the light fitting.

### Clean underneath the floor mat

All Venter horse boxes have been fitted with a mat securing strip to prevent the mat from slipping or moving.

Securing strip

### Clean underneath the mat

Option 1 .Lift both ends of the mat simultaneously and roll the mat towards the back of the trailer.

Once the mat is at the back of the trailer you can gain access and clean the floor. Once clean and **dry** the mat can be rolled back.

## Clean underneath the mat

Option 2. Lift both ends of the mat simultaneously and fold both pieces simultaneously towards the back of the trailer.

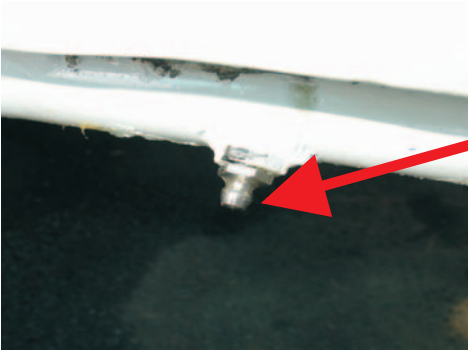

Holding both sides of the mat, pull the mat completely out of the trailer, overlapping the ramp. The trailer can be cleaned, dried out and the mat can be put back into position.

## **Grease the back and side ramp hinges**

There are 7 grease points on the back ramp of the 2 berth horse box, 8 on the Royal Horse box which have to be greased monthly with the grease gun provided. There are 5 grease points on the Royal horse box side ramp which have to be greased monthly.

Grease point

## Grease the coupler

There are 2 grease points on the coupler of the horse box which have to be greased monthly with the grease gun provided.

### **Charge the light fitting**

The light fitting must be charged before it can be used.  
To unclip the light fitting slide it up and pull it forward.
